

Product overview

product name	ABC3C rabbit Polyclonal Antibody
catalog No.	ATA24119
Category	Primary antibodies
Host	Rabbit
Species specificity	Human
Tested applications	WB,ELISA
Clonality	Polyclonal
Conjugation	Unconjugated
Immunogen	Synthesized peptide derived from human protein . at AA range: 10-90

Product performance

Form	Liquid
Storage	Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 4 °C for frequent use. Store at -20 to -80 °C for twelve months from the date of receipt.
Purity	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.

Dilution range

WB 1:500-2000 ELISA 1:5000-20000

Product background

apolipoprotein B mRNA editing enzyme catalytic subunit 3C(APOBEC3C) Homo sapiens This gene is a member of the cytidine deaminase gene family. It is one of seven related genes or pseudogenes found in a cluster thought to result from gene duplication, on chromosome 22. Members of the cluster encode proteins that are structurally and functionally related to the C to U RNA-editing cytidine deaminase APOBEC1. It is thought that the proteins may be RNA editing enzymes and have roles in growth or cell cycle control. [provided by RefSeq, Jul 2008],
