

Product Details

Summary

Product name	Anti AFP mouse monoclonal antibody (4B6)
description	Alpha-Fetoprotein (AFP) is a glycoprotein, normally produced during fetal development by the hepatocytes. Its level is increased in pregnant women. AFP is an important marker for the diagnosis of hepatocellular carcinoma.
Alternative names	AFP, Alpha-fetoprotein, Alpha-1-fetoprotein, Alpha-fetoglobulin
Endotoxin level	Please contact with the lab for this information.
Stability &Storage	Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8 °C for one week . Store at -20 to -80 °C for twelve months from the date of receipt.
Source	Ascites
Isotype	IgG1
Host	Mouse
Clonality	Monoclonal
Clone No.	4B6
Conjugation	Unconjugated
Species reactivity	Homo sapiens (Human)
Tested applications	WB,IHC,ELISA
Immunogen	Recombinant protein of full length human alpha-fetoprotein

Product performance

Form	Liquid
Buffer	PBS, pH7.4, containing 0.02% NaN ₃ , 50% glycerol.
Concentration	Please refer to the instruction in the hard copy of COA.

Note

For research use only.
