

ATAGENIX LABORATORIES

Catalog Number:ATEP02442COV Recombinant 2019-nCoV PL-Pro

Product Details

Summary

Product name Recombinant 2019-nCoV PL-Pro

Catalog# ATEP02442COV

description Recombinant SARS-CoV-2 PL-Pro is produced by E.coli expression system and

the target gene encoding Glu1564-IIe1877 is expressed with N-His Tag

Expression system E.coli

Species Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2)

Accession # QHD43415.1

Alternative names nsp3,PL-PRO,Papain-like proteinase,Peptidase C16 domain

Predicted Molecular Mass 38.59kDa

Actual Molecular Mass 39kDa

Purity >90% as determined by SDS-PAGE

Endotoxin level Please contact with the lab for this information.

Formulation Lyophilized Lyophilized from PBS pH7.4,0.02%NLS,1mM EDTA, 4%trehalose,1%

mannitol.

Shipping In general, proteins are shipped out with blue ice unless customers require

otherwise.

Stability &Storage Use a manual defrost freezer and avoid repeated freeze thaw cycles.

Store at 2 to 8 °C for one week .

Store at -20 to -80 °C for twelve months from the date of receipt.

Reconstitution Reconstitute in sterile water for a stock solution.

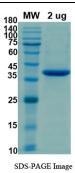

Application Immunogen

Recombinant 2019-nCoV PL-Pro

SDS-PAGE image

Background

The coronaviral proteases, papain-like protease (PLpro) and 3C-like protease (3CLpro), are attractive antiviral drug targets because they are essential for coronaviral replication. PLpro has the additional function of stripping ubiquitin and ISG15 from host-cell proteins to aid coronaviruses in their evasion of the host innate immune responses. Targeting PLpro with antiviral drugs may have an advantage in not only inhibiting viral replication but also inhibiting the dysregulation of signaling cascades in infected cells that may lead to cell death in surrounding, uninfected cells.

Product performance

Form

Recombinant SARS-CoV-2(2019-nCoV) PL-Pro
