

## Product overview

|                     |                                                                                                             |
|---------------------|-------------------------------------------------------------------------------------------------------------|
| product name        | Anti-Human CD110/MPL Antibody (PHA38)                                                                       |
| catalog No.         | FHE26220                                                                                                    |
| Brand               | Antibodysystem                                                                                              |
| Host                | Mouse                                                                                                       |
| Species specificity | Human                                                                                                       |
| Tested applications | FCM                                                                                                         |
| Clonality           | Monoclonal                                                                                                  |
| Conjugation         | Unconjugated                                                                                                |
| Alternative Names   | TPO-R, TPOR, Thrombopoietin receptor, MPL, Myeloproliferative leukemia protein, Proto-oncogene c-Mpl, CD110 |
| Uniprot ID          | P40238                                                                                                      |
| Note                | For Research Use Only.                                                                                      |

## Product performance

|               |                                                                 |
|---------------|-----------------------------------------------------------------|
| Form          | Liquid                                                          |
| Buffer        | PBS, pH 7.4, containing 0.09% sodium azide.                     |
| Storage       | Store undiluted antibody solution at 2°C to 8°C. Do not freeze. |
| Concentration | 1 mg/ml                                                         |
| Isotype       | IgG1-kappa                                                      |
| Purity        | > 95% by SDS-PAGE.                                              |
